

BRAIN INJURY CLAIMS

1ST EDITION

**New
Title**

GENERAL EDITORS: Dr Martin D van den Broek and Dr Sundeep Sembi

Brain Injury Claims examines the legal and clinical aspects of brain injury litigation with a particular emphasis on exploring the mechanisms of traumatic brain injuries, the neurological and neuropsychological sequelae, treatment and rehabilitation, and employment and care issues. The text reviews the central question of judicial reasoning when considering evidence, and incorporates illustrative case studies. **Brain Injury Claims** is a key text in civil litigation for both claimant and defendant lawyers and all of those involved in compensation claims.

GENERAL EDITORS:

Dr Martin van den Broek, PhD, C.Psychol; The Neuropsychology Clinic, Guildford. Dr van den Broek is a Consultant Clinical Neuropsychologist with a wealth of experience in brain injury cases and as an expert witness. His work has been published in various journals.

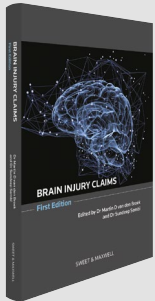

Dr Sundeep Sembi, Clin.Psy.D, C.Psychol, of Psychology Chambers, 10 Harley Street, is a Consultant Clinical Neuropsychologist with considerable medico-legal expertise, former Senior Clinical Lecturer and Head of Neuropsychology services, and he maintains academic and clinical research interests and presents internationally.

KEY FEATURES:

- The law and assessing capacity, and the Mental Capacity Act (2005)
- Neurosurgical, neurological and neuroradiological aspects of brain trauma, and how brain damage occurs and the medical consequences
- Problems with establishing the diagnosis and the neuropsychological assessment of mild and moderate-to-severe injuries
- Emotional and neuropsychiatric aspects of brain trauma
- The issues of malingering and exaggeration in litigation; the incidence of invalid presentations and symptom and performance validity assessment
- Rehabilitation and treatment of the brain injured survivor
- Factors influencing employment, disability discrimination, and vocational rehabilitation
- The assessment of care needs and long-term support
- Evaluating the evidence and the factors that determine the Court's decision-making
